# INQUEST®

InQuest's integrated cloud email security solution (ICES), MailTAC, leverages our patented Deep File Inspection® (DFI) technology to analyze, identify, and ultimately prevent malware, phishing, business email compromise (BEC), ransomware, spam, and scams from being delivered to your users inboxes.

Seamlessly integrate our cloud-based email security solution with your existing Microsoft Exchange, Google Workspace or Office 365 email providers in minutes and address the gaps in their threat defense coverage by supplementing them with our account takeover, anti-phishing, advanced threat prevention, computer vision, image analysis and machine learning capabilities.

CORE COMPETENCIES

- Threat Prevention
- Threat Hunting via RetroHunting
- Data Loss Prevention
- Actionable and Automated Threat Intelligence

FEATURES & BENEFITS

- Email Analytics at Scale
- Comprehensive Phishing and Malware Protection
- Proactive Ransomware Protection
